How to buy, trade and receive free XRdoge

Create a Xumm wallet.

Setup and fund an XRP "XUMM" wallet https://xumm.app/. If you haven't got a xumm wallet, it's pretty awesome if you like XRP so I'd recommend having one anyway.

Xumm is wallet built to interact with the XRPL. When you trade with Xumm on a Dex like Sologenic, you keep custody of your own tokens!

Below are two great video tutorials on how to use the Xumm wallet.

Set up a trust line

To buy, hold and trade XRdoge using the Xumm wallet, you will need to set up a trustline to the XRdoge issuing account. This will also make you eligible for the free XRdoge airdrop during the promotional period.

This is done at https://xumm.community/-a project giving you access to the XRPL via your Xumm wallet. You will need to sign in using your Xumm wallet, and then you will set up a trust line to the following:

Token Address: rLqUC2eCPohYvJCEBJ77eCCqVL2uEiczjA
Token Currency Code: XRdoge.

We recommend two excellent video walkthrough guides. The second demonstrates a different token but if one changes the Counterparty and Token currency code, it works well.

How to buy & trade on the Decentralised Exchange

Custom trading pairs have been made available by Sologenic DEX. We will start by going over how to set up a XRDOGE/XRP trading pair.

1.) Go to Xumm.Community and click on XRPL Tokens on the top left.
2.) Search your desired currency abbreviation or issuing address "XRdoge".
   rLqUC2eCPohYvJCEBJ77eCCqVL2uEiczjA
3.) Copy and paste the issuing address.
4.) On Sologenic.org go to Trade. Select the Solo/XRP pair at the top and this search bar will appear. Click base pair.

Once you select base pair you will see this. Select "issuer" and "other". Paste the currency code here.

You'll see "XRdoge" with a bunch of numbers afterward, select and you're away.

Select "XRP" as your counter.

This is all the steps you need to set up a custom pair on the sologenic Dex.

You can now buy XRdoge and store it in your XRP XUMM wallet. It could hardly be easier.
